How to connect my bose soundbar to my samsung tv

Sometimes there are just too many remotes to keep track of. You can simplify things by using one remote to control your Samsung TV and soundbar. As long as your soundbar is connected to your TV with either an optical cable or HDMI via ARC, you can control the volume and mute the soundbar using your Samsung TV's remote. Note: Your TV menu may differ depending on the model. Setting up your TV's audio output will allow you to control the soundbar's volume using your remote. Once the output is set up, you can then choose to connect either a digital optical cable or an HDMI cable to the soundbar. After you do that, you'll be able to use one remote for both your TV and soundbar. Use the TV remote to navigate to Settings, select Sound, and then select Sound Output on your Samsung TV. Select your Samsung soundbar, and then select Close. Now you can use your TV remote to adjust volume and mute the soundbar. The soundbar should also turn on and off with the TV. By default, Samsung TV remotes should be able to control Samsung soundbars. If it isn't working, be sure the soundbar is powered on, and then press and hold the WOOFER button up until "ON - TV REMOTE" appears on the display (about 5 seconds). Next, you'll need to choose between connecting with an optical cable or an HDMI cable. Note: If your remote does not have the WOOFER button, check your user manual for how to turn on the TV Remote function. If you decided to use a digital optical cable, activate the Auto Power Link feature which will automatically turn the soundbar on or off with your TV. Connect a digital optical cable from your soundbar's optical port to your TV's optical port. Make sure to remove the plastic protector caps before using the optical cable. Set the soundbar to D.IN mode by pressing Source on the remote or soundbar. Press and hold the left direction on the directional pad on the remote to activate or deactivate Auto Power Link. The soundbar will turn on and off when the TV is turned on and off. Make sure you also set the audio output on the TV. Note: Auto Power Link only works with an optical connection and is turned on by default. If you decided to use an HDMI cable, activate the Anynet+ feature which automatically turns the soundbar on or off with your TV. Connect an HDMI cable from the HDMI OUT port on your soundbar to your TV's HDMI (ARC) port. Set the soundbar to D.IN mode by pressing Source on the remote or soundbar. After about 2 seconds, the source will automatically change to TV ARC. The soundbar will turn on and off when the TV is turned on and off. Make sure you also set the audio output on the TV. If you are having trouble with your remote for your TV or your soundbar and neither seems to be responding, you can try these steps to try and get your remote working again. If the remote for your Samsung soundbar gets lost and you need to replace it, you can get a new one at the Samsung parts website. Just enter the model of your soundbar to find the correct remote. There not working together. Bose surround sound to the TV or the other way around. HELP PLEASE. The Bose system worked with my old TV. If both the Bose and the TV have ARC (audio return channel) then you have to connect the Bose to the HDMI input labeled ARC and turn that function on in the TV and maybe Bose. If one or both doesn't have ARC then you will have connect as Alabalcho suggests. You might need an DAC to convert digital to analog audio if the Bose doesn't have digital input or a converter to go from optical to coax or vice versa if they both have digital but not the same kind. Most TVs do not output sound thru HDMI. If your TV is just a monitor (that is, you feed it thru set-top box like Dish/DirectTV/etc), run the STB into Bose, and from there into TV If your user your TV with aerial - check to see whether you can get optical out from TV -> optical in to BOSE Last compromise - headphones out from TV -> AUX in to BOSE If both the Bose and the TV have ARC (audio return channel) then you have to connect the Bose to the HDMI input labeled ARC and turn that function on in the TV and maybe Bose. If one or both doesn't have ARC then you will have connect as Alabalcho suggests. You might need an DAC to convert digital to analog audio if the Bose doesn't have digital input or a converter to go from optical to coax or vice versa if they both have digital but not the same kind. Audio 2 Dec 26, 2018 D Connecting Samsung sound bar to TCL TV Audio 3 Dec 23, 2018 Soundbars enrich your auditory experience when enjoying entertainment on your TV. One of the ways that they can be connected, if necessary, is by Bluetooth. On some models, you can connect your soundbar to your TV using a feature called SoundConnect. If the model year of your soundbar and your TV don't match, then you may need to mix and match the steps in this guide. Note: The TV SoundConnect (SoundShare) function is supported by some Samsung TVs released from 2015 and earlier. We recommend using a wired connection rather than using Bluetooth. For the best sound quality and performance, connect your soundbar with a Digital Audio Out (Optical) or an HDMI (ARC) cable. HDMI is better if the only external device connected to your TV is your soundbar. Otherwise, Digital Audio Out is usually the better option, depending on your setup. However, if you prefer to connect using Bluetooth, please keep the following in mind: Lip-sync errors may occur. You can only pair one Bluetooth TV to a soundbar at a time. The TV and Bluetooth device may disconnect, depending on the distance between them. You can't use Bluetooth devices and the Wi-Fi Speaker Surround Setup feature (also called Surround), or TV SoundConnect simultaneously. Electronic devices may cause radio interference and other issues. Devices that generate electromagnetic waves must be kept away from the soundbar, such as microwaves, wireless LAN devices, medical equipment, etc. A Bluetooth device may hum or malfunction: When part of your body is in contact with the Bluetooth device or the TV. When there are obstructions in between the TV and Bluetooth devices, such as a wall, corner, or office partitioning. The soundbar may not perform Bluetooth search or connection correctly under the following circumstances: If there is a strong electrical field around the soundbar. If several Bluetooth devices are simultaneously paired with the soundbar. If the Bluetooth device is turned off or malfunctioning. To pair a 2020 soundbar to a 2020 Samsung TV using Bluetooth: If you have the soundbar's remote handy, press the Bluetooth PAIR button on the remote control to enter the BT PAIRING mode. If you don't have the remote, press the Source button on the top panel and then select BT. After a few seconds, the panel will display BT READY if there is no Bluetooth device already connected to the soundbar. When BT READY appears, press and hold the Source button for more than 5 seconds until BT PAIRING displays. Once BT PAIRING displays on the soundbar, navigate to Home on your TV. Select Settings, and then select Sound. Select Sound Output, and then select Bluetooth Speaker List. Select your soundbar from the list. When the TV detects a nearby soundbar, the message Need Pairing or Paired will appear in the TV's Bluetooth device list. To connect the TV to the soundbar, select the message, and then establish a connection. When the TV is connected, [TV Name] → BT will appear on the soundbar's front display. To pair a 2019 soundbar to a 2019 Samsung TV using Bluetooth: If you have the soundbar's remote handy, press the Bluetooth PAIR button on the remote control to enter the BT PAIRING mode. If you don't have the remote, press the Source button on the top panel and then select BT. After a few seconds, the panel will display BT READY if there is no Bluetooth device already connected to the soundbar. When BT READY appears, press and hold the Source button for more than 5 seconds until BT PAIRING displays. Once BT PAIRING displays on the soundbar, navigate to Home on your TV. Select Settings, and then select Sound. Select Sound Output, and then select Bluetooth Speaker List. Select your soundbar from the list. When the TV detects a nearby soundbar, the message Need Pairing or Paired will appear in the TV's Bluetooth device list. To connect the TV to the soundbar, select the message, and then establish a connection. When the TV is connected, [TV Name] → BT will appear on the soundbar's front display. To pair a 2018 soundbar to a 2018 Samsung TV using Bluetooth: If you have the soundbar's remote handy, press the Bluetooth PAIR button on the remote control to enter the BT PAIRING mode. If you don't have the remote, press the Source button on the top panel and then select BT. After a few seconds, the panel will display BT READY if there is no Bluetooth device already connected to the soundbar. When BT READY appears, press and hold the Source button for more than 5 seconds until BT PAIRING displays. Once BT PAIRING displays on the soundbar, navigate to Home on your TV. Select Settings, and then select Sound. Select Sound Output, and then select Bluetooth Speaker List. Select your soundbar from the list. When the TV detects a nearby soundbar, the message Need Pairing or Paired will appear in the TV's Bluetooth device list. To connect the TV to the soundbar, select the message, and then establish a connection. When the TV is connected, [TV Name] → BT will appear on the soundbar's front display. To pair a 2018 soundbar to a 2018 Samsung TV using Bluetooth: If you have the soundbar's remote handy, press the Bluetooth PAIR button on the remote control to enter the BT PAIRING mode. If you don't have the remote, press the Source button on the top panel and then select BT. After a few seconds, the panel will display BT READY if there is no Bluetooth device already connected to the soundbar. When BT READY appears, press and hold the Source button for more than 5 seconds until BT PAIRING displays. Once BT PAIRING displays on the soundbar, navigate to Home on your TV.
