when they were a kid. When using a teacher it is important to focus on the only things the teacher will be able to help you with. Those include the ability to speak, think, and explain the nuances that have not been written or studied (yet). I'm not required to get a teacher or a teacher at this point, but if you're really looking forward to this part, now is the time to do it. Everything from here to abroad will not depend on your access to a teacher, teacher or native speaker, so you can still progress without having to complete this step. Proposed books and resources estimate time: n/a as you move along, there will always be more to learn. Don't be afraid to stop going ahead to indulge your curiosity. This slowdown will speed you up as you enhance past knowledge and make contacts between them. For times like this, book book is very good. If you're going to buy just one, I'd close to the basic book from the Japanese dictionary as a series. This is the best Japanese language reference book out there, in my opinion. Otherwise, see through the reference books section in Japanese textbooks for beginners, bookbooks, and article dictionaries. There are quite a few good ones! Read: Best Japanese Bookbook and Dictionaries Note: With any skill, it's important to focus on the things you're worse at. Lift the floor, not the ceiling, so to speak. If you do, you'll find everything else gets lifted, and you'll be less generally frustrated. You will have more data to indicate in the brain as more unknown ideas and concepts float on top. For example, if you're bad at verbs, pick up a Japanese verbs booklet and just read through it. It may take you this afternoon, but every act you see from that day day will not be detrimental to your progress. Instead, it will positively affect all other aspects of your Japanese. Raise the floor, because no matter how high your roof is, you'll still be on the floor. The average level of the Japanese is by far the worst. Most people who end up learning do it here (assuming they made it past in the first few weeks). The resources available begin to dry up, in terms of number and quality, and learners stumble or stumble. Without guidance, progress can feel like an impossible task. This is the average wall. The thing that makes the middle level harder, though, is what's happened to you here: your competence. The beginner section was your unconscious incompetence phase. That is, you didn't realize you were incompetent so you never felt frustrated, embarrassed or stupid, but now you know a thing or two, and it's enough to know that you're not amazing about this thing called Japanese. It hurts and it's because you're now consciously incompetent, and it's not At all. Fortunately, much of the pain felt by most learners at this stage comes from poor learning or teaching methods from beginner stages. Things you hope to avoid and although everyone will experience somewhat conscious incompetence, some people can get through it quickly and some get trapped here for years. Most, unfortunately, can't make it through at all and surrender. Be the kind of person who gets through this phase quickly. The other side of this wall is extremely fun and rewarding, so don't give up and don't let your conscious incompetence get down. Here's how to do it: Get to know this stage exists and know that you're supposed to feel these feelings uncomfortable. This helps with an amazing amount. You don't have to feel stupid because you know everyone is going through exactly the same situation. Everything is part of the process and if other people make it, you can too. You've been preparing for this moment and i've paved this guide for you by getting this fairly quickly. You're in advantage! Most people have been in the stage of conscious incompetence for a long time because they lack two things: kanji and vocabulary. But at this point, you know more kanji and vocabulary than any mid-level Japanese language student should. That's why you spent so much time on WaniKani (or one of its alternatives). It slows you down at first so you can blow up this wall. With all that in mind, it's time to start with some intermediates. Make sure you are good on 100% of previous sections before moving on. This is, by far, the most difficult part of your Japanese education. You must have a good foundation to jump out of. When you're ready, you can start browsing our pages about articles and grammar in Japanese. Good luck! 🍀🍀🍀
